March 2013 Competition

Theme: "Snow - Ice"

March 2013 Meeting

Two features of Adobe Photoshop Elements are filters and masks. Filters can be used to do many special effects to photographs. Masks can be used to limit what part of the photograph gets the effect.

In March, Cathy Butcher demonstrated how layers, filters, and masks can be used in Adobe Photoshop Elements to create many different effects on a singular photograph.

Members are asked to bring one large photograph to the April meeting. Refreshments will be served.

“There will be times when you will be in the field without a camera. And, you will see the most glorious sunset or the most beautiful scene that you have ever witnessed. Don't be bitter because you can't record it. Sit down, drink it in, and enjoy it for what it is!”
